

## Achintya Bezbaruah, NDSU

Achintya Bezbaruah is an Associate Professor of Civil and Environmental Engineering at North Dakota State University (NDSU, Fargo, ND, [www.ndsu.edu](http://www.ndsu.edu)). At NDSU his research group extensively works on environmental nanotechnology for groundwater remediation and life-cycle studies of nanomaterials. Specifically, his Nanoenvirology Research Group (<https://www.ndsu.edu/pubweb/nrg/>) works on plant-nanoparticle-microbe interactions at the molecular level and plant nutrient fortification using nanotechnology. His research has been funded by NSF, NIFA, and State of North Dakota. An active member of SNO since its inception, Achintya is instrumental in promoting young professional activities including Nano Pitch and SNO student organization. He is currently working on nanotechnology research and application promotion in North Dakota and his native state of Assam in North-east India.
